Dear Members of the SIEF on Slags, copper refining (EC 266-970-4) and similar substance Slag, copper converter EC 266-969-9

Through a previous message from SFF **Metallo Chimique**, we informed you on the intention of Metallo Chimique to act as Lead Registrant for the dossier on aforementioned substance. For your information, please find enclosed the letter from the SFF/Lead Registrant to Pre-SIEF members on substance identity, that was previously sent to you in the context of the "sameness discussion". Kindly note that in the course of these discussions, the previously proposed group has been amended by deleting from it EC 273-825-9 (Slag, lead smelting) and EC 305-408-5 (copper dross, now splitted and moved to separate dossiers). The registration dossier remaining in the scope of the REACH Copper Consortium now looks as :

Intermediate B8 - Slags, Copper Refining			
"Substance produced at high temperature in a liquid state, by melting mixtures of metal oxides and non-ferrous metals (from primary sources such as copper ores, matte, or anodes) or by oxidizing metals (from copper rich materials such as metals, alloys or metal oxides). Slag from copper refining contains relatively high amounts of copper oxides, and various amounts of other non-ferrous metals oxides"			
EC names	Substances covered	EC number/ EINECS No.	CAS No.
Slags, copper refining*	Slags from copper refining	266-970-4	67711-94-8
Slags, copper converter*		266-969-9	67711-93-7

Today Metallo Chimique would like to advise all SIEF members that it is nominated as LEAD REGISTRANT for the aforementioned dossier. For your consideration, please find attached the message sent from Lead Registrant to ECHA confirming the nomination.

Metallo Chimique is member of the REACH Copper Consortium managed by the European Copper Institute (ECI) and is preparing the Joint registration dossier for the first registration deadline 2010, as a substance used as **intermediate under Strictly Controlled Conditions**. We take the opportunity to thank those who responded to our "sameness" survey.

On basis of the previously outlined dossier specificities and substance ID, the REACH Copper Consortium, in close cooperation with the Lead Registrant will now move on in the preparation of the registration dossier. Please let us know soon in case you have relevant data to share.

With best regards, Katia Lacasse
Reach Copper Consortium Project Manager

With best regards, *Katia Lacasse*
